EXPERIENCE

Freelance Developer
Web Developer
May 2015 - Present

Met with clients and discussed a plan of action for developing websites to fit their needs. Utilized HTML, CSS, and JavaScript to develop fully functioning, responsive websites. Followed up with clients to fulfill any further needs.

Concern Report System
C# Developer
November 2015 - December 2015

Worked on a team with the sole purpose of developing a Concern Report System for Ranken Technical College. The system was built completely in MVC. My job was to develop methods that would send emails to the division that handles reports upon the creation and update of a report.
